Priyansh Patel

KADI,GUJARAT

+91 9173116601

prinshu.patel2004@gmail.com

Skills

Programming Languages
JavaScript,Python,Java

Web Development
HTML,CSS,JS,REST APIs

Frameworks & Libraries
Node.js,React.js,Express.js

Databases
MongoDB,MySQL

Tools & Technologies
GitHub,Postman,npm

Soft Skills
Problem Solving, Data Structures & Algorithms, Object-Oriented Programming, Strong communication

Certifications

Python for Data Science
NPTEL

Enhancing Soft Skills And Personality
NPTEL

Computer Engineering student with hands-on experience in full-stack development using Node.js and React. Currently building a health record system (MediTrakk) with role-based access and JWT auth.Seeking opportunities to apply and grow in real-world tech environments.

Projects

MediTrakk – Health Record & Appointment System (Full-Stack Project)
Full Stack Health Record & Appointment System

Tech Stack: React, TypeScript, Tailwind CSS, Node.js, Express.js, MongoDB
Status: In Development

- Built a full-stack health management system with **role-based access** for patients, doctors, and admins.
- Integrated **JWT authentication**, secure route protection, and user context.
- Developed features like **appointment booking**, **patient reports upload/download**, and **role-specific dashboards**.
- Created reusable UI components with **Tailwind CSS** for a clean and professional frontend.
- Enabled doctors to view reports of only their assigned patients using a **DoctorPatient mapping model**.
- Added medical report uploads , with frontend file validation and async downloading .
- Used **MongoDB** and **role-based routes** to provide dynamic and secure data access.
- Currently adding admin-level features like **user management** and **platform statistics**.

https://github.com/PriyanshCodes24/MediTrakk

E-commerce REST API
Built a backend REST API for an e-commerce website with user authentication, product management, and order handling.

Tech Stack: Node.js, Express.js, MongoDB

- Implemented routes for CRUD operations on users, products, and orders
- Used MongoDB for database operations and handled basic validations
- Used Postman for testing APIs

https://github.com/PriyanshCodes24/REST-APIs-for-Ecommerce

React Post Feed Web App
Built a responsive frontend web application with interactive post features

Tech Stack: React.js, JavaScript, CSS, Firebase

• Created a post feed interface with reusable React components

• Implemented like/unlike button functionality with real-time count tracking using React state
• Designed a responsive and clean UI with CSS
• Deployed the application using Firebase Hosting

https://react-project-f13e5.web.app/

Currency Converter
A simple tool to convert currency values using real-time exchange rates.
Tech Stack: HTML, CSS, JavaScript, API

- Used API to fetch exchange rates (e.g., exchangerate-api)
- Formatted currency values with proper UX
