Profiles

 PriyanshCodes24

 priyansh-patel

Computer Engineering student with hands-on experience in full-stack development in MERN stack. Built a health record system (MediTrakk) with role-based access and JWT auth. Seeking opportunities to apply and grow in real-world tech environments.

Experience

CODSOFT   Dec 2025 - Jan 2026
Web Development Intern   Remote
• Worked as a Web Development Intern and built a full-stack job portal application (InstaJob)

• Implemented backend APIs, authentication, and role-based access control

• Focused on building scalable, secure, and maintainable features

Education

LDRP-ITR   Bachelor of Engineering
Computer Engineering
8.04 CPI

Projects

InstaJob - Job Portal Web Application   December 2025 - January 2026
Full-stack job portal web application developed during
CODSOFT Web Development Internship.

Tech Stack: React, Node.js, Express, MongoDB, JWT, Tailwind CSS

• Built a full-stack job portal enabling recruiters to post jobs and applicants to apply and track applications

•Implemented JWT-based authentication and role-based access control

•Developed job search with filters, dashboards, and application tracking

•Secured REST APIs and implemented resume upload functionality

https://github.com/PriyanshCodes24/CODSOFT/tree/main/InstaJob

MediTrakk - Health Record & Appointment System
Full Stack Health Record & Appointment System

Tech Stack: React, TypeScript, Tailwind CSS, Node.js, Express.js, MongoDB

• Built a full-stack health record and appointment system with role-based access

• Implemented JWT authentication and secure route protection

• Developed appointment booking, report upload/download, and role-specific dashboards

• Designed reusable UI components with Tailwind CSS

• Built admin features for user management and system statistics

https://github.com/PriyanshCodes24/MediTrakk

React Post Feed Web App
Built a responsive frontend web application with interactive post features

Tech Stack: React.js, JavaScript, CSS, Firebase

• Built a React-based post feed with reusable components

• Implemented like/unlike functionality using state management
• Deployed the application using Firebase Hosting

https://react-project-f13e5.web.app/

Volunteering

LDRP-ITR   February 2024
